

## Demountable Flood Wall

The Flood Wall system is used in public spaces or commercial properties that need strong flood protection with unobstructed views when not deployed.

### Why people buy:

- ▶ Up to 10' H of flood protection at any span
- ▶ Goes up quick with low effort
- ▶ Very strong and water-tight as is (no “kick-stand”, sandbags, or poly required)

## Demountable Flood Barrier

The Flood Barrier system is used to protect openings in buildings of all shapes, sizes, and flood heights.

### Why people buy:

- ▶ Up to 10' H of flood protection
- ▶ Covers any opening
- ▶ Strong & durable materials
- ▶ Quick to deploy
- ▶ Easy to store
- ▶ Can be mounted in-jamb or on-surface

## “Super Light” Flood Barrier

The SL25 is the lightest demountable barrier on the market, making it the perfect fit for small-scale commercial and residential applications.

### Why people buy:

- ▶ Protects up to 40” H x 7’ W spans
- ▶ Minimal visual footprint (2” or less in depth)
- ▶ \$1,000 USD or less per standard doorway
- ▶ Can be painted any color
- ▶ Light, but durable aluminum construction is easy to deploy

## Demountable “Heavy Duty”

The “Heavy Duty” flood defense system is used for commercial and municipal projects where high levels of strong water are expected.

### Why people buy:

- ▶ Up to 15’ H of flood protection
- ▶ A range of thickness, strength, and durability options
- ▶ Very strong and water-tight as is (no “kick-stand”, sandbags, or poly required)

## Permanent Glass Wall

The Glass Wall provides maximum, permanent, flood protection + clean views of waterside and high-risk properties that have difficulty with rapid deployment.

### Why people buy:

- ▶ Looks great
- ▶ Does not block views
- ▶ Always protected
- ▶ Up to 4' H of flood protection at any span
