

How it works

THE STRENGTH IS IN THE TOE

The pressure of the water forces the toe downward, thus overpowering the hydrostatic force, which anchors the wall to the ground.

DESIGNED FOR SPEED

The coupler-joint connection allows each wall to securely connect one with another. The coupler-joint system allows for a 22° range of motion at each connection enabling Muscle Wall to adapt to its terrain.

CUSTOMIZE YOUR PROTECTION

Our customers have the option of using a corner unit that enables a 90-degree turn. Each corner unit is also reversible, so it can be used to branch your protection off in either direction.

NESTLE TO SHIP AND STORE

The unique “L” shaped design of Muscle Wall enables each wall to nestle together with another in order to maximize shipping and storage space.
